

Scenario 2: Your client is painting her kitchen with the color in Figure 2, a lovely beige color. She wants to draw out the pink undertones as much as possible.

Figure 2

1. Would you recommend that your client purchase a light bulb with a color temperature between 2700 K and 3000 K or a color temperature over 5000 K? Explain your reasoning.
2. The windows in your client's room face west. How will this impact the natural lighting in the room?

Scenario 3: Your client is repainting her south-facing guest room. She loves the color in Figure 3, but is worried the vibrant green might be too bright for a bedroom. She wants her guests to enjoy a soothing environment.

Figure 3

1. How will the natural light in your client's south-facing room impact the paint color?
2. What paint color could you recommend as an alternative to the color in Figure 3? Choose a color from your fan deck and indicate the color number below. Explain why this is a suitable option.
